

EXPERIENCE

Carlos Rodriguez has been performing project management NDT testing, structural evaluations, and structural repairs for CERS during the past 7 years. Among the most relevant projects in which he has participated are the following: underground tunnels, high rise buildings, wastewater treatment plants and industrial piers.

Carlos has been recently responsible for cost estimating and project management of contracts for the execution of structural repairs.

Before joining CERS, Carlos worked as a field Supervisor for the construction and finishing of concrete pavements and industrial floors. He has experience in the concrete management in construction and quality control in several civil construction projects.
